SEPTEMBER 2025

PROJECT PROGRESS AND KEY UPDATES

In September, we re-energized the SWITCH project by resuming our Upskilling Labs and intercultural dialogue sessions after the summer break. This time, we focused on the effects of technology and finance on our daily lives.

In the Cybersecurity & Emerging Technologies Module, participants learned key data protection principles and discussed the effects of digital transformation. Later in the month, we concentrated on Financial and Economic Literacy, where participants evaluated budgeting, planning, and global trends impacting the future of work and society.

RECENT DECISIONS

The sessions aimed to make participants understand more about finance and economics, emphasizing their significance in today's environment. Through case discussions and collaborative exercises, participants examined essential concepts like budgeting, planning, and emerging financial trends.

These activities promoted critical reflection on the effects of economic changes on young people and facilitated exchanges of experiences among participants from different countries.

GENERAL INFORMATION

The SWITCH project, aligned with Erasmus+ priorities, aims to foster intercultural dialogue and enhance soft skills among young people and youth organizations across EU-associated and non-associated countries. Our goals include bridging gaps for disadvantaged youth, preventing digital and cultural risks, and developing skills through innovative online methodologies.

Thank you for your dedication and collaboration. For any questions or additional information, please reach out to the project coordinators.
