

August 2025

PRESS RELEASE #6

The SWITCH project announces the conclusion of its summer activities following months of successful online learning sessions. Recent tracks delivered through the Upskilling Labs focused on critical practical skills, including employability, entrepreneurial thinking, and media literacy. Participants refined professional profiles through CV workshops and live pitches, tested venture ideas through team challenges, and learned how to identify online misinformation.

During August 2025, the SWITCH consortium and its community observed a planned seasonal pause to evaluate completed activities and prepare for the next stage of the project. Interactive sessions resume in September with dedicated tracks on digital transformation and financial literacy. These upcoming modules will continue to connect youth from partner countries through collaborative problem-solving and cross-border discussions.

Funded by the Erasmus+ program, SWITCH brings together organizations from Portugal, Spain, the Netherlands, Albania, Kosovo, and Montenegro. The initiative remains focused on bridging educational opportunities for young people, expanding digital literacy, and encouraging intercultural exchange.

The project team thanks all participating learners and institutions for their commitment. For questions or further information about upcoming sessions, please contact the project coordinators at switchinvirtual@gmail.com.
